

# Harf of Jaar As Sifah

Till Now ....

Till now we have been dealing with simple single word isms as Mawsoof as well as Sifah, like the above example.

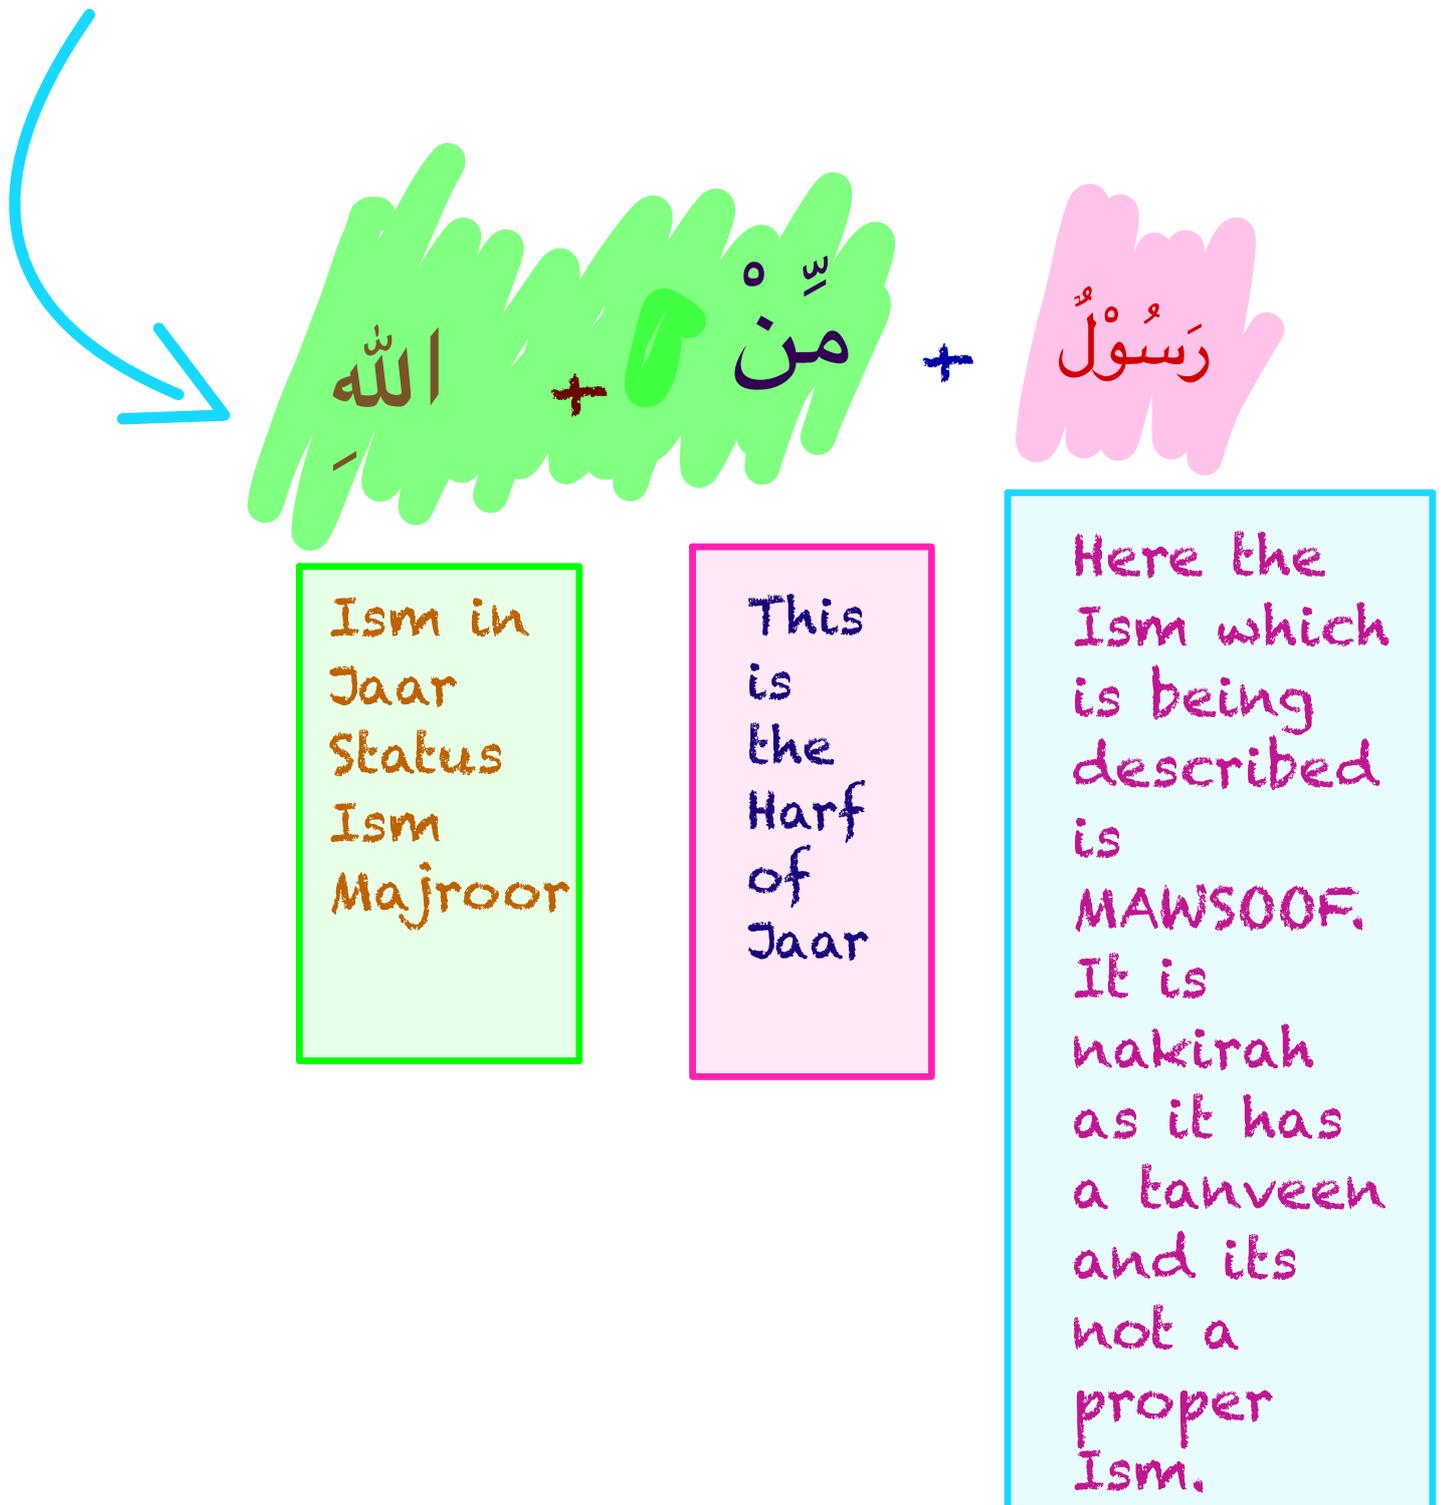

We had studied that the Mawsoof Sifah chain needed the following conditions,

1. Both isms
2. 4 properties match
3. One ism is describing the other

This is true for simple isms being chained together

But when we see an ism in nakirah with tanveen in fully flexible isms or no al in partly flexible isms and then they are followed by a HOJ and its ism majroor then

we assume that the Common ism becomes mawsoof and the HOJ fragment coming after the nakirah Ism becomes the sifah. The sifah is no longer a simple one word ism but an HOJ fragment

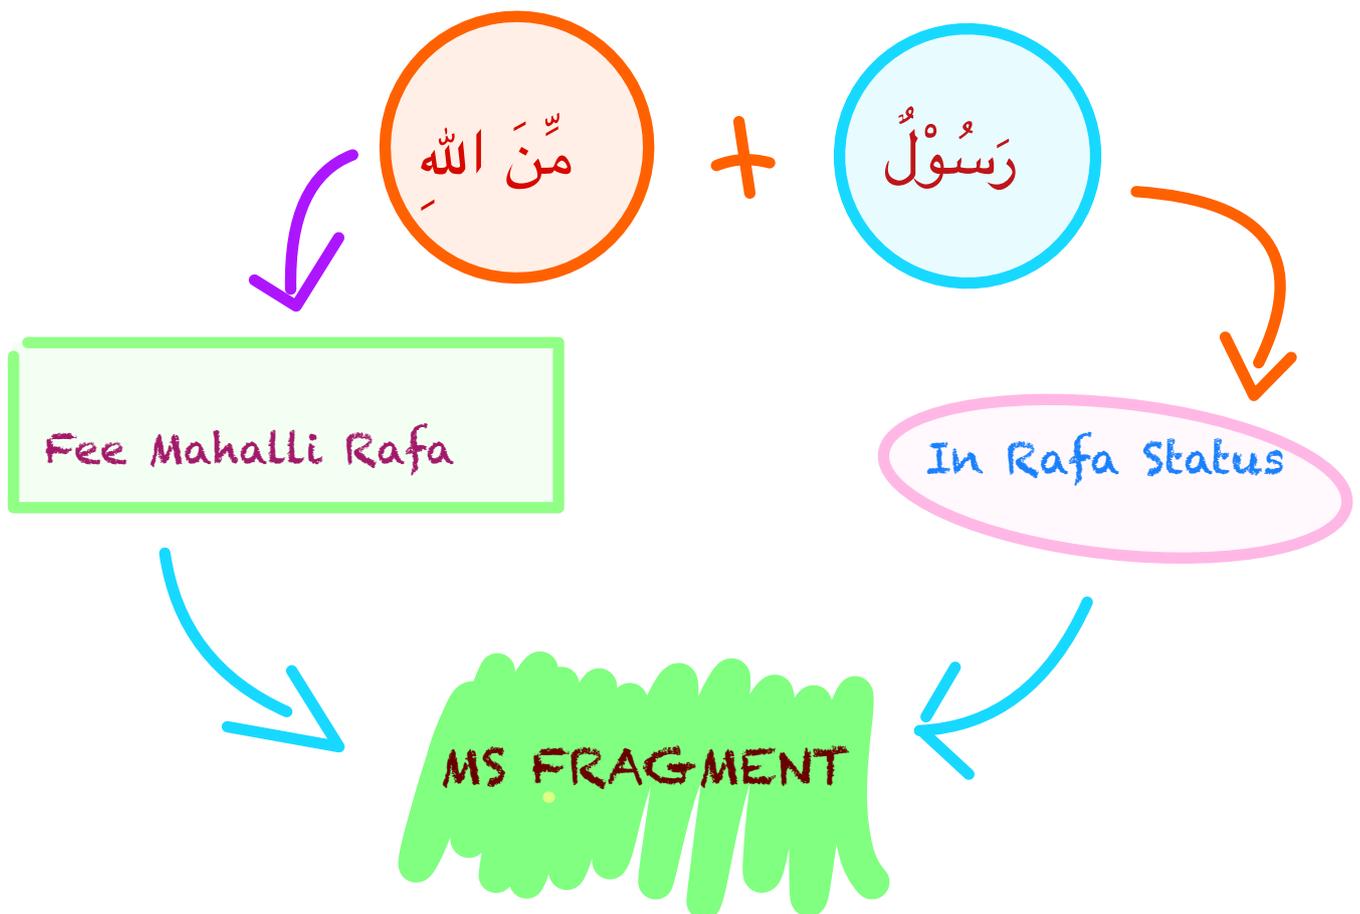

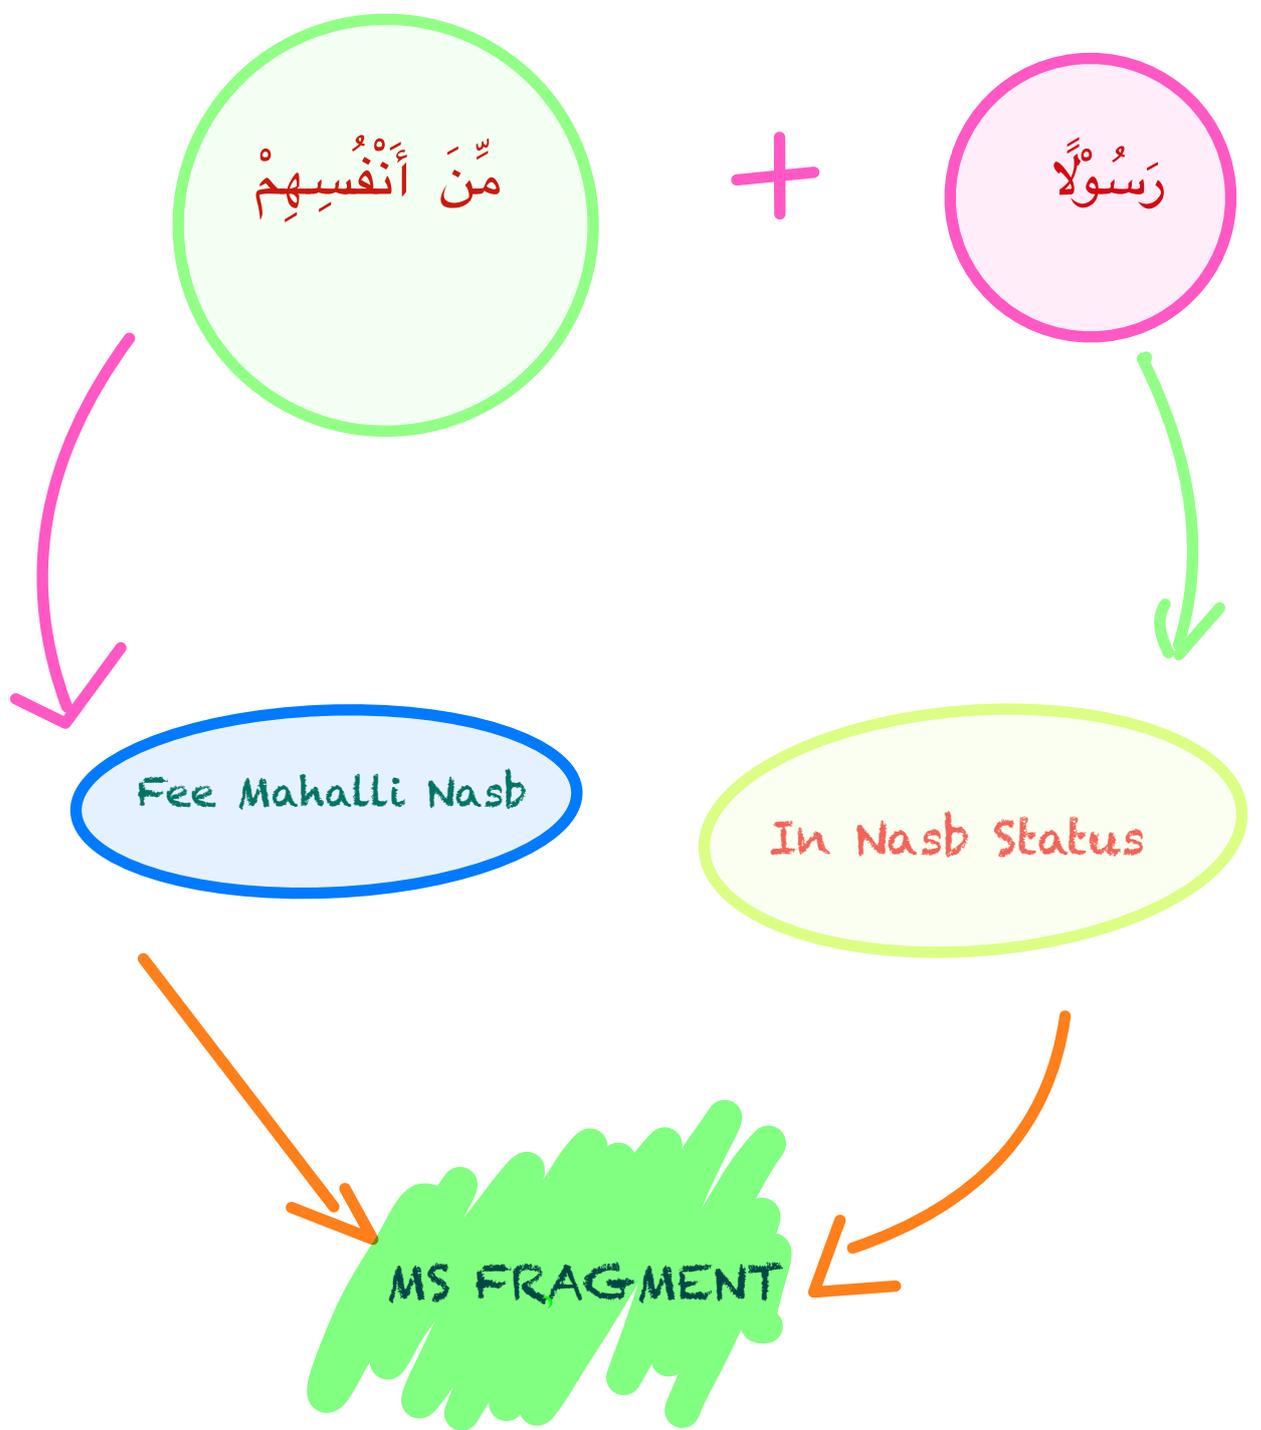

So now you have

Mawsoof (ism in nakirah) + HOJ fragment (fee mahalliR/N/J)  
= Mawsoof Sifah fragment

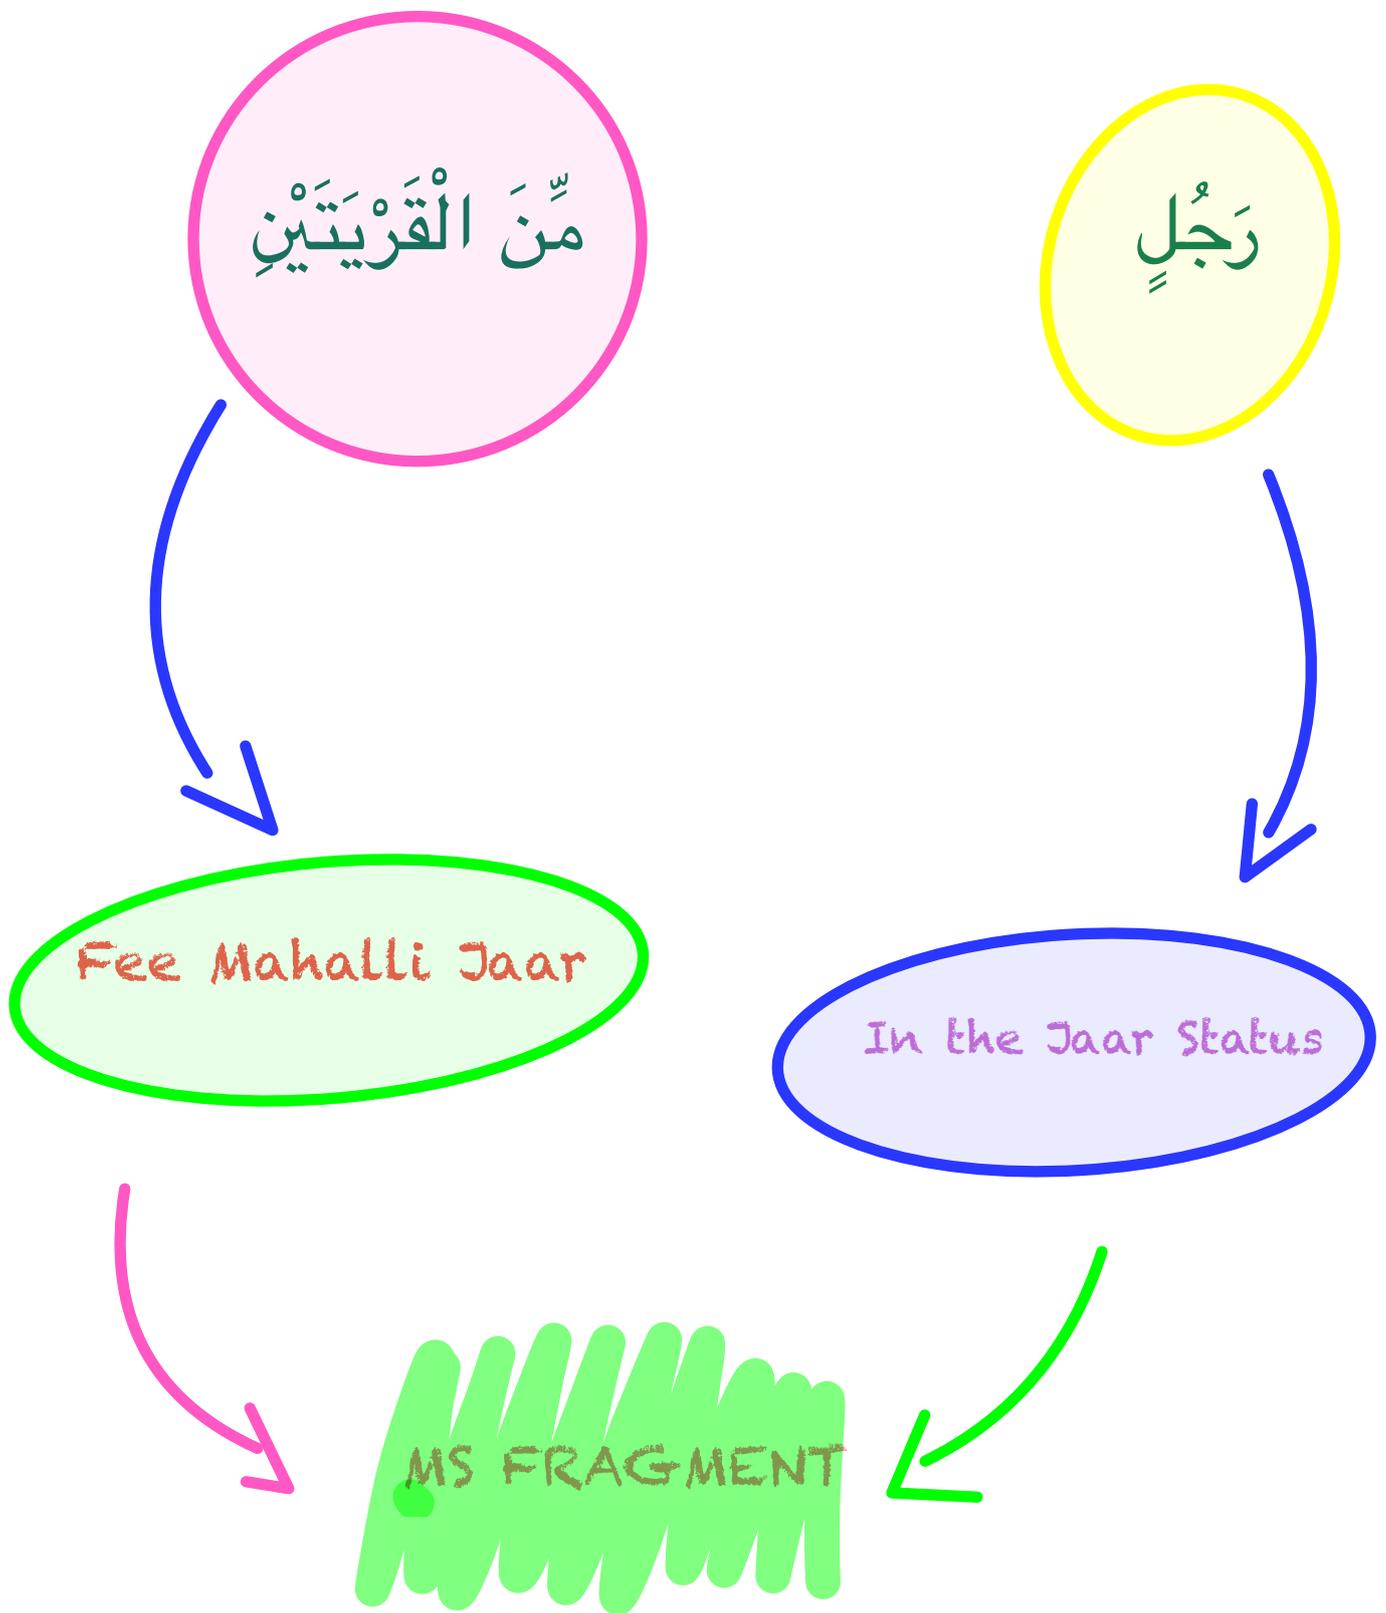

Now in the example we did previously, can be an example of the Nakirah Mawsoof being in Rafa status and the HOJ fragment being the Sifah has to be Rafa but the problem is it cannot show it's status.

So in order to solve this problem we apply the concept of FEE MAHALLI which makes us visualize the HOJ fragment as a whole word in Rafa status as it is in place of Rafa because the whole fragment is acting as a Sifah coming after a Rafa Mawsoof

So in the above case because the Nakirah Ism which is Mawsoof because of the HOJ fragment after it is in Nasb status so therefore following the previous example the status of the HOJ fragment will be FEE MAHALLI NASB as it is sifah

So in the above case because the Nakirah Ism which is Mawsoof because of the HOJ fragment after it is in Jaar status so there fore following the previous example the status of the HOJ fragment will be FEE MAHALLI JAAR as it is sifah

# Conditions of HOJ Fragment as Sifah

Not every HOJ fragment will be a Sifah. There are certain conditions that need to be met in order for an HOJ fragment to qualify as a Sifah in a Mawsoof Sifah fragment. They are as follows,

1. Only when the Ism which is Mawsoof will be Nakirah (common)

2. Only when the HOJ Fragment is after the Nakirah Ism

3. Only if it makes sense

فِيهِ آيَاتٌ بَيِّنَاتٌ

~~MS Fragment~~

The HOJ Fragment is not after the Nakirah Ism
