

WHAT ARE MASDARS ?

Well its like if i say

Zaid ate an apple

Here "ate" is a word which is

1. Stuck in time in past
2. Shows an action

Now If I say,

Ayesha is eating or will eat her dinner

Here the word eating is,

1. Stuck in time in the present or future tense
2. It shows action taking place

So we can say

Fil = Action + Time

But if I say

I don't like eating

Here eating is an action but we can't decide when the action took place.

Eating when ? Past, present or future

We cannot tell so when an action word is used without specifying any time its called an idea and idea is called masdar in arabic

Masdar = Action word - Time
